Representative Experience

BKK Landfill Project, West Covina, CA

Manage and Client Representative on behalf of a Multi-Party Group for a closed 200-acre Hazardous Waste Landfill Project. This work is under the oversight provided by DTSC and ERRG as required by Consent Decrees. Manage tasks, including Essential Activities for the Class I and Class III landfills, and, Engineering Evaluation/Cost Analysis (EE/CA) for the Class I landfill per the CD-required SOW.

Oil Superfund Site, Monterey Park, California

Field Activities Manager for CD-3 RD investigations under the oversight of EPA. Managed project specific field tasks including vendors performing O&M activities.

Exide and Vernon Environmental Response Trusts (VERT)

Assisted Environmental Trustee, for the Vernon Exide former battery manufacturing, recycling, and lead smelting facility previously owned and operated by Exide Technologies. For this site, on behalf of the Trusts, Mr. Faucheux lead the field effort to carry out the site management and administrative functions (such as budgets, permits, fees) assisted in the implementation of environmental actions, manage subcontractors implementing the resumption of the decontamination and demolition activities at the facility, transfer of permits and fulfilled other Consent Decree obligations. The VERT worked under the oversight of the two beneficiaries, the US Environmental Protection Agency and the California Department of Toxic Substances Control.

Ascon Landfill Site Project, Huntington Beach, CA

Assisted with the Interim Removal Measure Project including the preparation of Work Plans, Reports and Request for Proposals (RFPs) and assisted with the Evaluation and Selection Process for the Waste Transportation and Disposal, and Construction and Engineering Services for this phase of the project. Also, participated in the evaluation of alternatives for Daily Cover and determining the most cost-effective method for deploying this material.

Purity Oil Superfund Site, Fresno, CA

Key contact and Construction Manager for the enforcement/oversight for the implementation of all remedial activities including the evaluation of design modification. Provided technical consulting services and negotiation support between EPA, the PRP, and PRP's consultants. Also provided quality control and construction/contractor oversight.

Phase II Investigations and On-going Groundwater Quality Assessment Projects

Project Manager and Assistant Project Manager for numerous Phase II Investigations and on-going groundwater quality assessment projects for private sector clients.

Yerington Anaconda Mine Site, Yerington, Nevada

Provided project management support to EPA's RPM and assisted EPA in the initial phase of the project by prioritizing the OUs in determining a path forward. Conducted field activities during the completion of sediment, soil, and groundwater sampling. Performed oversight of field activities.
