Representative Experience

Newark Bay Study Area, Newark, NJ

Assisting the PRP Group Coordinator with strategic support for select entities who received General Notice Letters. Responsibilities include: Budgeting, Scheduling and Critical Path Analysis, Data Analysis and Geospatial plotting of key COPCs, community relations, and the production of timely, high quality deliverables.

Confidential Superfund Site, NJ

Working on behalf of the former owner of this CERCLA site to develop a credible and defensible allocation of remedial costs between our client and subsequent users of the site for the two operable units. Responsibilities include: supervised the work of technical experts to produce timely, high quality deliverables with appropriate budgets, project budgeting and cost forecasting, high-level review of work product, Preparation of effective technical presentations to the client.

Waste Disposal, Inc. (WDI) Superfund Site, Santa Fe Springs, CA

Alternate Project Coordinator for a multi-party PRP site. Responsibilities include meeting organization and facilitation, information communication, resource management, preparation of technical presentations, interfacing with State and Federal project managers, bid package formulation and resource selection, community relationship building, field oversight, created and maintained a construction progress website for PRPs to review site remediation progress, and action item management.

Hendry County Site, FL

Alternate project manager responsible for client interaction and coordination of PNL resources to generate conceptual designs for plume remediation. Also responsible for preparation and quality control on all PNL analysis and graphical work products, coordination of efforts of PNL's Houston based alliance partner, and responsible for project details such as: schedule, risk management, alternatives scoping, and cost analysis.

Best Practices Group Coordination

Facilitating the "Best Practices" Group, which consists of ~5 Fortune 100 Companies. Responsibilities include: meeting presentations and meeting facilitation, creation and analysis of a benchmarking study (to examine each company's management practices and portfolio metrics and to benchmark these against best-in-class competitors), and training workshop creation and facilitation (training has included a 2-day CERCLA course and a 1-day Sediment Training Session).

Employment History

2019 to Current PathForward Consulting, Inc., *Associate*

Provides consulting services.

2002 to 2018 Project Navigator, Ltd., *Project Manager*

Project Manager responsible for client interaction and coordination of PNL resources to generate conceptual designs for plume remediation. Responsible for preparation and quality control on all PNL analysis and graphical work products. Coordinated efforts of PNL's Houston based alliance partner. Responsible for project details such as: schedule, risk management, alternatives scoping, and cost analysis.

2000 to 2002 Environmental Systems Research Institute (ESRI), *Software Release Manager*

Managed the quality of software releases (ArcGIS 8.2, ArcReader). Identified and managed Beta Test Sites. Managed the master bug list and ensured critical fixes. Performed certification testing of ArcGIS versions on Windows 2000 platforms using AVRAIDER and Visual Basic component tests. Release manager for ArcReader product for ArcGIS 8.2. Release manager for 3D, Maplex, and StreetMap Europe extensions.
